GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

D. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation  acres; Stockwatering ; Domestic   
Other (specify) dust control, minimal stock watering

E. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

F. If part of the water listed in Part C consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.

There are two principal types of surface water rights in California, riparian and appropriative rights.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available, including the following:

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"  
"Information Pertaining to Water Rights in California"  
"Water Rights for Stockponds Constructed Prior to 1969"  
"Appropriation of Water in California"

STATE OF CALIFORNIA  
THE RESOURCES AGENCY  
STATE WATER RESOURCES CONTROL BOARD  
DIVISION OF WATER RIGHTS  
STATEMENT OF WATER DIVERSION AND USE **S 8295**

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water Johns-Manville Products Corp.  
Address 2500 Miguelito Road Lompoc, California 93436 (805) 736-1221  
(TELEPHONE NUMBER)

B. Name of body of water at point of diversion Salsipuedes Creek  
Tributary to Santa Ynez River

C. Place of diversion 1/4 Section 1/4, Township 6 N., Range 34 W., S. B. B&M,  
Santa Barbara County, or locate it on sketch of section grid on reverse side with regard to section  
lines or prominent local landmarks. (See attached map)

D. Name of works Number 24 and 28 Wells

E. Capacity of diversion works 250 and 450 respectively cubic feet per second  
Capacity of storage reservoir 200,000 gallons per minute  
State quantity of water used each month in gallons or ~~cubic feet~~ gallons

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1973	3,748	3,261	4,507	5,992	6,344	6,059	4,863	5,816	5,306	5,609	4,797	4,390	60,692

Note - 000 omitted

If monthly and annual use are not known, check months in which water was used. State extent of use in  
units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.

Maximum annual water use in recent years 70,193,000 (1968) gallons  
Minimum annual water use in recent years 43,147,000 (1959) gallons  
Type of diversion facility: gravity ☐, pumps ☒

Method of measurement: weir ☐, flume ☐, electric power meter ☐, water meter ☒, estimate ☐

F. Purpose of use (what water is being used for): Dust control in processing systems and  
sprinkling of quarry roads

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)  
See attached map

H. Year of first use as nearly as known 1947

I. Name of person filing statement C. A. Carlson  
Position Plant Manager Organization Lompoc Plant Johns-Manville Prod. Corp.  
Address 2500 Miguelito Road Lompoc, California 93436

I declare under penalty of perjury that the above is true and correct to the best of my knowledge and belief.  
DATE: 3/12/74 19 74 at Lompoc, California.

Signature: C. A. Carlson
